

# Infrastructure Masterclass

## Intensive One-Day Construction Procurement Workshop

Let's work together. Procuring construction services in the public sector is a highly specialized practice requiring unique experience, knowledge, and skill.

This one-day, highly focused workshop for public sector employees reviews foundational best practices in procurement and highlights issues relevant to today's unique construction market challenges.

### TOPICS

- Foundations of competitive contracting law in Canada
- Unique public sector obligations
- Construction delivery options
- Leveraging market intelligence
- Role of bonding and sureties
- Procurement methods
- Evaluation strategies
- Industry templates and resource
- Selecting design professionals

### LEARNING OBJECTIVES

- Review public sector procurement obligations and processes
- Examine BC Government's Capital Asset Management Framework construction as a best practice (and as required)
- Assess the risks and benefits of construction project delivery methods
- Explore collaboration strategies to enhance project success
- Practice identifying the most appropriate procurement process and project delivery method
- For a real project, design a procurement process and delivery method

With more \$75 billion worth of construction projects underway in BC this year, contractors in demand, resources at a premium, and timelines tight, now more than ever procurement professionals hold the master key to successful project delivery.

This workshop provides a uniquely tangible return on training dollars, measured by reduced risk of litigation and scope creep, achieved timelines, and more in-budget bids.

### PRESENTED BY:

### DATE AND LOCATION

Nov 22, 2018 OR Feb 22, 2019  
8:00am- 4:00pm  
VRCA Training Room  
3636 E. 4th Avenue, Vancouver

### WHO SHOULD ATTEND?

Public sector employees at the local, regional, and provincial levels, including those from school districts and health authorities, who manage the construction procurement process, regardless of experience level.
